3/9-14 SILVERTON MOUNTAIN COLORADO

Silverton Mountain is a unique ski area concept, created with the expert side country ski enthusiast in mind. There is one chairlift that takes you into a high alpine environment surrounded by amazing ski lines in every direction. The terrain is entirely for the advanced and expert skier and those who enjoy natural ungroomed skiing. During restricted periods of the season the area limits the tickets sold to no more than 80 skiers, which provides a snowcat like ski experience without the wait at the bottom for the cat to pick you up for the next run. The mountain has 2,000 vertical feet of chair lift and with a little hiking you can reach the top of Storm Peak at 13,487'. If you include this access Silverton is the highest ski area in North America, and it is also the steepest (according to their ads) with no easy way down. The mountain is left in its natural state with no grooming, no timber thinning or ski runs cut, with the one exception being the avalanche reduction work which occurs. The chairlift unloads at the top of a beautiful cirque which provides easy hiking along a ridge to access up to 1,819 acres of snow fields. It is usually possible to venture into new terrain on a daily basis, providing new skiing and usually new powder opportunities for days after the most recent snowfall. We will be starting our tour here after they have been closed for two days to let the snow build. We will also be hiring local guides for our three days on the mountain.

Prior to our run at Silverton we will spend two days of normal ski area skiing to acclimatize to the altitude (for all the lowlanders in the group). Silverton also offers single ride Helicopter skiing options. Provided: transit, rental car, airfare, lodging, 2 days guided AT skiing at Silverton. Dates 3/9-14 Cost \$1997
